

TRENCH SHEETING KD400-6

Shore Hire stock a range of trench sheets used for temporary applications.

Our range of overlapping Trench Sheeting can be used in digging and placing of short sheets in shallow excavations to full depth driving in deeper excavations.

All the sections are well matched for use with our other support systems as depicted in this brochure.

TRENCH SHEETING SPECIFICATIONS

Steel thickness (mm)	6.0
Weight per lineal metre (kg)	22.8
Weight per square metre (kg)	60.0
Section modulus sheet (10^3mm^3)	35.0
Section modulus/metre (10^3mm^3)	92.0
Bending moment/lineal metre (kNm)	18.22
Allowable stress (Mpa)	200.0
Standard Lengths (m)	3, 4
