Trak Mats, Temp Fencing, Rumble Grids & Kerb Ramps

Trak Mats

Trak Mats are designed to be used by rubber tyred/tracked machines.

Trak Mats are lightweight mats for rubber-tyred or rubber-tracked vehicles up to 60 tonnes in weight. They are easy to handle with hand cut outs, will not rot or absorb water and are flexible.

The grip surface profile is designed to dispel mud while vehicles traverse and still give non-skid traction.

Trak Mats can be used to:

- Protect grassed areas
- Provide access on sandy surfaces
- Create temporary roadways
- Make work pads for utility contractors
- Allow pedestrian access
- Connect together using Trak Mat joiners
- Give ground protection at sporting events
- Support rubber-tyred/tracked machines, not designed for use with steel track machinery

TRAK MAT SPECIFICATIONS

Size	Thickness	Weight	Load	Colour	Material
2440 x 1130mm	13mm	34kg	60t	Light Green	HD Polyethylene

Temporary Fencing

With a galvanised finish and fully welded frame supported by a Fence Base, the system is designed for fast erection and dismantling.

Temporary fencing is suitable for building, construction, excavation, demolition and general crowd control.

Additional bracing available to add support to fences.

TEMPORARY FENCING SPECIFICATIONS

Description	Dimensions	Weight
Fence Panel	24255 x 2000mm	27kg
Concrete Base	600 x 220 x 150mm	30kg
Rubber Base	750 x 200 x 150mm	24kg

Rumble Grids

Rumble Grid Side Profile

Features

- Portable
- Reduces road clean up costs
- 4000mm x 2150mm sections
- Sections connect together with pins
- Easy to clean out

RUMBLE GRID SPECIFICATIONS

Length	Width	Weight
2150mm	4000mm	854kg

Kerb Ramps

KERB RAMP SPECIFICATIONS

Size	Thickness	Weight
3000 x 900mm	25mm	565kg
