## HEAVY DUTY TRIPOD

### TRIPOD-HD

This aluminium tripod has been designed for tough work conditions and long term use and is particularly suitable for the hire industry. Rectangular, fully adjustable legs and a one piece cast head are designed to resist damage. Integrated twin pulleys and an additional auxiliary anchorage point allow many options and combinations of access, egress and rescue equipment to be specified.

The following products can be used on the Heavy Duty Tripod:

- IKHRA30 30m 3 way self retracting lifeline
- FPRB15 15m 3 way self retracting lifeline
- FPMS 20 20m personnel winch
- 4000 rescue pulley system

## ROLL UP RESCUE STRETCHER

Weighing 6kg and with its own carry bag with shoulder straps the Shore Hire Rescue Stretcher is manufactured from heavy duty PVC with neutral buoyancy. It is used for horizontal, vertical, confined space, rope and helicopter rescue. Having no metal parts enables the casualty to remain in the splint for any X-ray, Cat Scan or MRI procedure.

### FEATURES

- Rated for one person in the stretcher and one rescuer
- SWL 350kg Horizontal, 250kg Vertical
- Roll up design for easy storage
- Lightweight and compact
- Can be used for horizontal, vertical and confined space rescues
- No metal components
- Wraps around body
- 6kg, 2000mm long by 800mm wide

# CONFINED SPACE EQUIPMENT

## CONFINED SPACE GAS DETECTOR

Four gas Confined Space Gas Detector kit comprising of, calibration certificate, 240v charger, bump test kit and 4 Gas Detector and instructions, all in a sturdy transport case. The unit is IP68 water-resistant rated for 45min up to 1.2m depth.

### FEATURES

- Easy to use one button operation, small light weight and wearable
- 2 months of battery runtime – get two months of continuous gas detection on a single charge
- Up to four months of battery life if you turn off the detector at the end of each shift. That means no daily charging and no unexpected downtime
- Extreme ingress protection for total confidence, with IP ratings of 66 and 68, BW Icon/Flex detectors stand up to dust and immersion in water
- No expertise required. Icon/Flex detectors have only one button for simple use – even if you're wearing gloves – which prevents tampering while reducing training time
- Keep workers safe without weighing them down

## OXYGEN SELF RESCUER

This small, robust KO<sup>2</sup> respiratory device delivers safe and immediate oxygen on demand for escape or rescue. Packed airtight in a stainless-steel container, this lightweight device is designed to be worn on a belt for easy opening and use. Dons in seconds. 20–100min duration, depending upon breathing rate.

### FEATURES

- Small, light (1.6kg) but robust device
- Stainless steel container
- Carried on belt or chest
- Long service life
- Oxygen supply according to demand
- Simple handling
- Largely maintenance free
- Long storage life
- EN 13794 class 20S, SOLAS and NSW Coal Mines Approved
